Although we as a district do not want to require the wearing of mask, it is true that the wearing of a mask eliminates the need to quarantine in almost all scenarios. Knowing this, would you support a mask requirement for a specified amount of time?
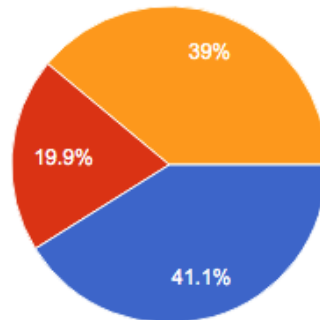

518 responses

- I would support a mask requirement for a specified amount of time.
- I would not support a mask requirement.

COVID PARENT SURVEY RESULTS

If quarantine numbers continue to rise and the district is faced with two options which would you be inclined to support?
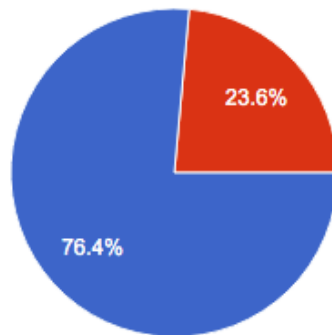

518 responses

- A mask requirement for a period of time to keep school open and to keep activities up and running.
- Close the school using calamity days for a period of time to slow down the spread of COVID. This may require extending the school year once calamity days are exhausted.
- I would support both options.

Would you support a school closure for the week after fair week? This potentially could minimize the spread of COVID in our schools in the event that some were infected during fair week. Currently the state is not allowing the use of remote learning days in place of calamity days. This closure would include a stoppage of events and extra-curriculars.
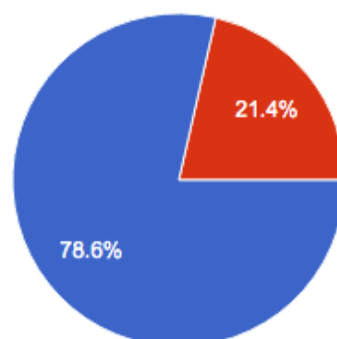

518 responses

- I would support this plan.
- I would not support this option.
